

Sun Protection Policy

Very young children have sensitive skin that can be easily damaged by the sun's dangerous UV rays. Children in our care may also spend a lot of their time outdoors. At this young age, they are unable to take responsibility for their own sun protection. So we as carers have a responsibility to ensure that children in our care are protected from the harmful effects of the sun. Although fair skinned people are more at risk from sun damage, sun protection is relevant to both fair and dark skinned children.

AIMS

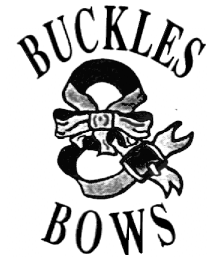

- PROTECTION: providing an environment that enables children and staff to stay safe in the sun
- EDUCATION: learning about sun safety to increase knowledge and influence behaviour
- COLLABORATION: working with parents, the management structure and the wider community to reinforce awareness about sun safety in our organisation.

At Buckles and Bows, we want staff and children to enjoy the sun safely. We will work with staff and parents to achieve this through:

EDUCATION - these measures are in place from now on:

All children will have a story time at the start of the summer term. All children will paint pictures to reinforce the sun protection messages. We are adding a song to those we normally sing around this time of year. Parents and guardians will be sent a letter explaining what we are doing about sun protection and how they can help at the beginning of the summer term.

Sun Protection Policy

Shade:

We have a covered area where children will be encouraged to play during the hottest part of the day.

Timetabling:

Children will spend more time playing outside before 11am and after 2pm,

Clothing:

We will actively encourage all children to wear a hat when playing outside. We have some nursery hats to lend to children who forget their own. All staff have also agreed to wear hats when outside to set a good example.

Hydration:

Children are encouraged to drink regularly during the day but during extreme hot weather particular care will be taken to remind them of the need to do this. The water system gives access to fresh water at any time.

Sunscreen:

We will send letters home asking parents to apply sunscreen before attending nursery during the summer months. If the child is staying all day they must bring in a labeled bottle of sunscreen

We are sorry, but we won't have a nursery stock of sunscreen as time and possible allergies don't allow us to.
